

PES 2008 General Meeting Technical Tours

Nuclear Power Generation & Electronics Tour

**Hosted by:
Westinghouse Nuclear LLC and Compunetix, Inc**

(Information Subject to Change Without Notice)

Tour # 3WE23PM Wednesday July 23, 2008

Registration: On Line at PES-2008 Website, Tour Cost: See Registration

Tour Capacity: 30 People Maximum Per Tour

Tour Duration: Departs Convention Center 12:30 pm Returns by 5:00 pm

Note: Attendees must wear clothing with sleeves over shoulders and shoes with enclosed toes.

Nuclear power is a proven, safe, plentiful and clean source of power generation, and Westinghouse Electric Company, the pioneer and global leader in nuclear plant design and construction, is ready with the *AP1000™ pressurized water reactor (PWR). It is the only Generation III+ reactor to receive Design Certification from the U.S. Nuclear Regulatory Commission (NRC). The AP1000, based on the proven performance of Westinghouse-designed PWRs, is an advanced 1154 mW nuclear power plant that uses the forces of nature and simplicity of design to enhance plant safety and operations and reduce construction costs. Westinghouse will provide an overview of the AP1000 plant design as well as a tour of the Main Control Room Simulator Test Facility that is under development.

Compunetix designs and manufactures, in its Industry Systems Division (ISD), teleconferencing and videoconferencing equipment. ISD also does contract manufacturing for a variety of external customers. The tour will focus on automated printed circuit assembly, including solder past screening, part placement, wave and infrared reflow soldering, cleaning, coating and test. Hand assembly of electronics and final mechanical fabrication of Compunetix' own products will also be part of the tour.
