POST**

IEEE

IEEE Buffalo Section Dinner Meeting

Joint with the Computer Society and
Engineering Management, Power Energy, Industry Applications
Control Systems, Communications, Gold,
Microwave Theory & Techniques, and Antennas & Propagation Societies

Friday October 31, 2008 at 6:00 pm

**Safety Engineering Considerations in the System Lifecycle
Standards and Hazards Analysis**

This presentation will specifically address:

- what a safety case is
- how risk management and hazards analysis fit into a system development life-cycle
- the hazards analysis process and supporting hazards techniques
- limitations of the software development process
- planning issues for safety-critical system development
- the latest International, IEEE standards and sector-specific standards applicable to safety-related software

Speaker John Harauz Senior Member – IEEE Computer Society

Independent consultant and registered professional engineer. Founding member of the new Technical Committee on Safety of Systems under the IEEE Systems Council.

Meeting Holiday Inn - Amherst
1881 Niagara Falls Blvd
Amherst, NY

Choices Chicken Marsala, Stuffed Pork Chop, or Pasta Primavera

Cost Members \$18; Non-Members \$20; Students & Life Members \$14;

Reservations by October 28, 2008: Judy Moskal 689-6689
