IEEE Buffalo Section Dinner Meeting

Joint with Professional Engineering and Communications Societies and Power Energy and Industry Applications, Engineering Management, Gold, Microwave Theory & Techniques, Antennas & Propagation, and Computer Societies.

Thursday December 11, 2008 at 6:00 pm

Next Generation Fiber-Optic Communications

Fiber-Optic communications provides substantial increases in data and communications speed and reliability. However construction and renovation projects have to make different accommodations for communications to provide for this new medium. This presentation will explain how to do this.

Speaker: Robert McCarthy, P.E.
Verizon Communications

1.0 PDH (Professional development hour) of continuing education credit available.
