Call for Papers

Objectives:

Wireless communications has developed as a key element of modern society. From satellite transmission, radio and television broadcasting to the now ubiquitous mobile telephone, wireless communications has revolutionized the way societies function. The aim of this conference is to provide a platform to researchers, technologists and implementers to exchange ideas and new developments in wireless communications.

Call for papers:

Conference will include invited papers, contributed papers and panel discussions. Technical papers on original work and contributions are invited. Authors are requested to submit an abstract not exceeding 500 words by electronic mail before September 1, 2009. The abstract should be in the IEEE standard format. In case of multiple authors, please indicate the person to whom correspondence is to be made. The necessary guidelines for preparing the full length paper will be given along with the acceptance letter.

Conference topics:

- Wireless Technology – Current status and future trends
- ICT – relevant applications for India
- Satellite communication
- Location based Services
- Mobile Networks – movement towards all IP networks
- Broadband services, 3G, 4G, LTE, WiMAX etc
- Integration of diverse networks – GSM, CDMA, WiFi, WiMAX etc.
- Vehicular wireless communications
- Networks for transportation, railways, aviation etc
- Sensor, Adhoc, adaptive networks
- Security in Wireless Communication

Technical Exhibition:

A technical exhibition based on the conference theme is an integral part of the program. It offers a golden opportunity for the industries to exhibit their products/equipments and advertise the capabilities to a wide cross-section of wireless community.
