Lesson Plans

TryEngineering offers a variety of lesson plans that align with education standards to allow teachers and students to apply engineering principles in the classroom. The matrix below will allow you to select a lesson that will be age and content appropriate for your classroom.

Download the full lesson plan PDF file to see how the lesson plan aligns with Educational Standards.

List of Plans, by Age:

| 8 | 9 | 10 | **11** | 12 | 13 | 14 | 15 | 16 | 17 | 18 |

1-42 of 42

A Century of Plastics

Lesson Focus: Lesson focuses on how plastics of all sorts have been engineered in to everyday products over the past century, with emphasis on materials selection and engineering.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Adaptive Device Design

Lesson Focus: Lesson focuses on the engineering of adaptive or assistive devices, such as prosthetic devices, wheelchairs, eyeglasses, grab bars, hearing aids, lifts, or braces.

Ages 8-18

Design and Build a Better Candy Bag

Lesson Focus: Demonstrate how product design differences can affect the success of a final product -- in this case a bag for holding candy. Students work in pairs to evaluate, design, and build a better candy bag.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Build Your Own Robot Arm

Lesson Focus: Develop a robot arm using common materials. Students will explore design, construction, teamwork, and materials selection and use.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Clipper Creations

Lesson Focus: Develop a working model of a nail clipper.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Cracking the Code

Lesson Focus: Lesson focuses on how computerized barcodes have improved efficiency in product distribution; explores the barcoding process and engineering design.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Critical Load

Lesson Focus: Lesson focuses on issues civil engineers face, including critical load and how to reinforce the design of a structure to hold more weight.

Ages 8-14

[View Detail](#)
[Download PDF](#)

EEEEK- A Mouse!

Lesson Focus: Lesson focuses on computer and mechanical engineering and explores how computer mice operate and how engineering provided an interface between man and machine.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Electric Switches

Lesson Focus: Demonstrate how electric circuits can be controlled with a simple switch. Note: This lesson plan is designed for classroom use only, with supervision by a teacher familiar with electrical and electronic concepts.

Ages 8-11

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Electric Messages: Then and Now

Lesson Focus: Lesson focuses on exploring electric

[View Detail](#)

| | | |
|---|-----------|--|
| message systems, from light signals using International Morse Code to text messaging. Students construct a simple telegraph using a battery, wires, a switch, and bulb, and explore the impact of communications on society. | Ages 8-14 | Download PDF Take Survey |
| Flashlights and Batteries Lesson Focus: Lesson focuses on the concept of electron flow through the demonstration of electrical circuits in a flashlight, and how batteries operate. | Ages 8-11 | View Detail Download PDF Take Survey |
| Getting Your Bearings Lesson Focus: Lesson focuses on the concept of friction and the use of ball bearings to reduce friction. | Ages 8-18 | View Detail Download PDF Take Survey |
| Give Me a Brake Lesson Focus: Lesson focuses on brakes, force, and friction, using bicycle rim brakes to demonstrate basic braking mechanisms to stop, slow, or prevent motion. | Ages 8-18 | View Detail Download PDF Take Survey |
| Heart of the Matter Lesson Focus: Lesson focuses on the engineering and operation of artificial heart valves, and the interface between man and machine. | Ages 8-18 | View Detail Download PDF Take Survey |
| Here Comes the Sun Lesson Focus: Lesson focuses on solar panel design, and its application in the standard calculator. It explores how both solar panels and calculators operate and explores simple circuits using solar power. | Ages 8-18 | View Detail Download PDF Take Survey |
| Insulators and Conductors Lesson Focus: Demonstrating the concept of conducting or insulating electricity. Note: This lesson plan is designed for classroom use only, with supervision by a teacher familiar with electrical and electronic concepts. | Ages 8-11 | View Detail Download PDF Take Survey |
| Pulleys and Force Lesson Focus: Lesson focuses on the concept of force and the use of pulleys to reduce required force. | Ages 8-11 | View Detail Download PDF Take Survey |
| Series and Parallel Circuits Lesson Focus: Demonstrate and discuss simple circuits and the differences between parallel and serial circuit design and functions. Note: This lesson plan is designed for classroom use only, with supervision by a teacher familiar with electrical and electronic concepts. | Ages 8-14 | View Detail Download PDF Take Survey |
| Simple Machines Lesson Focus: Simple machines: their principles and uses. | Ages 8-11 | View Detail Download PDF Take Survey |
| Two Button Buzzer Circuit Lesson Focus: Demonstrate how two switches interact in an electrical circuit such as that used to sound a buzzer. Note: This lesson plan is designed for classroom use only, with supervision by a teacher familiar with electrical and electronic concepts. | Ages 8-14 | View Detail Download PDF Take Survey |
| Give Binary a Try! Lesson Focus: Lesson focuses on how binary codes function and binary applications for computer engineers. The lesson offers students an activity to learn to download software and read online binary clock, and advanced students an opportunity to build one from a kit. | Ages 8-18 | View Detail Download PDF Take Survey |
| Sticky Engineering Challenge Lesson Focus: Lesson focuses on how engineers work to solve problems and impact daily life through new and improved products. As engineers do, teams of students select adhesive options to help them meet a construction goal. | Ages 8-18 | View Detail Download PDF Take Survey |
| Build a Big Wheel Lesson Focus: Lesson focuses on the engineering behind big wheels (sometimes called Ferris wheels). Teams of students explore the engineering behind the "London Eye," explore the history of big wheels, and construct a working wheel model using pasta, glue, | Ages 8-18 | View Detail Download PDF Take Survey |

and teabags.

Hand Biometrics Technology

Lesson Focus: Lesson focuses on engineering applications of biometric technologies for identification or security applications. After exploring hand geometry biometrics, students work in teams of "engineers" to evaluate pros and cons of incorporating a hand recognition biometric technology into a new security system for a museum.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Infrared Investigations

Lesson Focus: Lesson focuses on how infrared technology is used by engineers creating equipment and system for a variety of industries. Teams of students explore the application of infrared in remote controls, test materials that encourage or prevent infrared transmission, and develop systems that allow transmission of infrared in restricted environments.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Move That Lighthouse!

Lesson Focus: Lesson focuses on how engineers have to evaluate multiple structural, economic, and environmental factors when moving a building.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Pipeline Challenge

Lesson Focus: Lesson focuses on how engineers develop pipeline systems to transport oil, water, gas, and other materials over very long distances. Students work in teams of "engineers" to develop a pipeline system to transport both a golf ball and ping pong ball across the classroom terrain.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Sail Away

Lesson Focus: Lesson focuses on watercraft engineering and sailing. Students work in teams to design a sailboat out of everyday objects that can catch a breeze from a fan, stay afloat with a set load, and sail four feet.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Ship the Chip

Lesson Focus: Lesson focuses on engineering package designs that meet the needs of safely shipping a product. Students work in teams of "engineers" to design a package using standard materials that will safely ship a single chip through the mail to the school address.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Sort it Out!

Lesson Focus: Lesson focuses on the engineering behind industrial sorting processes. Working as an engineering group, students then work in teams to design and build a system to sort different sized coins for packaging.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Simple Kitchen Machines

Lesson Focus: Lesson focuses on simple machines and how they can be found in many everyday items. Students explore the different types of simple machines, how they work, and how they are integrated into many items. Students explore common kitchen machines and identify how many simple machine types are incorporated into each item.

Ages 8-11

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Engineered Memory

Lesson Focus: Lesson focuses on the engineering behind storage devices, and engineering improvements over time. Though exploring the operation of the "floppy" disk, students explore the mechanics underlying operation, and then test the disk under a variety of conditions.

Ages 8-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

All About Electric Motors

Lesson Focus: Electric Motors: their principles and everyday uses. Note: This lesson plan is designed for classroom use only, with supervision by a teacher familiar with electrical and electronic concepts.

Ages 10-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Get Connected With Ohm's Law

Lesson Focus: Demonstrate Ohm's Law using digital multi-meters. Fun hands-on activities are presented that demonstrate Ohm's Law. Teachers use digital multi-meters to collect data that are plotted to show

Ages 10-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

that voltage and current are related by linear functions for ordinary resistors and by power functions for light bulbs.

Engineering Air Traffic

Lesson Focus: Lesson focuses on the engineering behind air traffic control systems. Students work in teams to evaluate data generated for a virtual air traffic system, and determine a plan to bring three planes safely through a set airspace. They then recommend engineering enhancement to the current system.

Ages 11-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Dispenser Designs

Lesson Focus: Lesson focuses on how engineers have to design objects to meet the needs of users, while considering the limitations of materials, and the implications of cost.

Ages 11-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Engineering Ups and Downs

Lesson Focus: Lesson focuses on the engineering behind elevators. Teams of students explore principals and requirements of vertical travel, then design and construct a working elevator to service a toy car garage using wheels, pulleys, string, cardboard and other materials.

Ages 11-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Program Your Own Game

Lesson Focus: Lesson focuses on how software engineers design computer games and other software. Student teams work together to develop a simple computer program using free software that is available in multiple languages.

Ages 11-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

A Question of Balance

Lesson Focus: Lesson focuses on the use of weight scales and measurement by manufacturing engineers. Teams of students are posed with the challenge of developing a system to fill jars with a specific weight or count of products such as marbles or paperclips.

Ages 11-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Hull Engineering

Lesson Focus: Lesson focuses on how the shape of ship's hull can impact its speed and stability potential in water. Teams of students design and test their own ship's hull on paper, and build it using foam and other everyday materials.

Ages 11-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Engineered Sports

Lesson Focus: Lesson focuses on how the principals of aerospace engineering have impacted golf ball design, along with equipment used in other sports. Students analyze the use of dimples on golf balls, and work as a team of engineers to determine whether adding dimples to airplanes would increase fuel efficiency for the airline industry. They also explore the physics of bounce as it relates to several sports balls.

Ages 11-18

[View Detail](#)
[Download PDF](#)
[Take Survey](#)

Wind Tunnel Testing

Lesson Focus: Lesson focuses on wind tunnel tests that engineers in many industries use to when developing products such as airplanes, cars, and even buildings. Teams of students build their own model car out of everyday products and test their design in a wind tunnel made of a fan blowing through a long cardboard box.

Ages 11-18
