## Hyderabad, India

### Introduction:

Hyderabad, the capital city of Andhra Pradesh, offers a fascinating panorama of the past, with a rich blend of cultural and historical tradition spanning over 400 years. Presently a strong Industrial, Commercial and Information Technology Center, Hyderabad is emerging into an important tourist destination. Thus today Hyderabad offers a combination of a rich traditional ambience and the most modern, progressive and developed urban centre in India

# About Hyderabad

- A multitude of influences have shaped the character of the city. Its palaces and buildings, houses and tenements, gardens and streets have a history and an architectural individuality of their own, which makes Hyderabad a city of enchantment.

- Hyderabad was founded on the River Musi five miles east of Golconda, in 1591-92 by Muhammad Quli Qutb Shah. In the 16th century the city grew spontaneously to accommodate the surplus population of Golconda, which was the capital of the Qutb Shahi rulers. Many buildings sprang up along the River Musi. Gradually the city grew.

# About Hyderabad: Indian School of Business (ISB)

The Indian School of Business (ISB) could be undoubtedly considered, as one of its kind not only in Asia but also in the world. The ISB is a research-led institution and offers high-quality postgraduate, executive and doctoral programmes for students from all over the world. The Indian School of Business (ISB) is a research-oriented, independent management institution that aims to groom future generations of business leaders. The ISB offers a one-year Post Graduate Programme in Management (equivalent to an MBA) and short-duration Management courses for Senior Executives. The institution is dynamic and ever evolving in building knowledge for a global community that is extremely reliant on technology and highly entrepreneurial. With an emphasis on creative leadership as its goal, the ISB aims to groom a new breed of thinking business leaders for the present generation.

## About Hyderabad

# International Institute of Information Technology (IIIT)

- The International Institute of Information Technology (formerly Indian Institute of Information Technology), Hyderabad is an autonomous, self-supporting institution started in 1998 with seed support from the Government of Andhra Pradesh. A major goal of IIIT is to impart a uniquely broad and interdisciplinary IT education of the highest academic quality. This is achieved through an integrated curriculum that consists of a highly diverse set of IT courses, interdisciplinary IT research projects, day-to-day interaction with industry, preparation in entrepreneurship and personality development courses.

## TENCON 2006 : **Theme**

### **IT for ALL: Challenges and Opportunities**

Information Technology (IT) has had a revolutionary effect on the lives of people across the world in the last decades of the 20th century. This has ensured a sea-change in governance too, in the way a government functions and takes care of its people.

IT has an impact today on every government. But it has to be taken to every doorstep to ensure the development and uniform progress for all. The aim should be to envision a IT-networked world where IT can be used for the benefit of the common man.

**Opportunities:** Possible strategic partnerships between countries, firms etc, resulting in expansion of trade, ensure mutual progress which in the end will result in eliminating digital divide while empowering every individual through IT.

**The objective :** The conference will be to bring different stakeholders – corporates, government and academia – together along with leading thinkers and practitioners across the globe to network, exchange ideas and experiences and to formulate strategies. The conference will have lectures, presentations and tutorials on the theme which can be put into practical use to maximize benefits.
