# Table of Contents

- **Mirela Sechi Moretti Annoni Notare** ................................................................. 1871
- **Editorial - IEEE Latin America Transactions Volume 13 Issue 6 June 2015** 1873
- **Automatic System Distillation for Wine Fruit** 1882
- **D-stability Analysis of Descriptor Systems and Application in Power Systems** 1888
- **Design and Construction of a 3D Printer Auto Controller Wirelessly Through of Free Software** 1893
- **Design of a Mechatronic System for Fault Detection in a Rotor under Misalignment and Unbalance** 1899
- **Fuzzy Logic for Omni directional Mobile Platform Control Displacement using FPGA and Bluetooth** 1907
- **Mobile Robot Navigation Assisted by GPS** 1915
- **Performance Evaluation of a Distributed MPC Strategy Applied to the Continuous Stirred Tank Reactor** 1921
- **Robust Control for cultivation of microorganisms in a high density fed-batch bioreactor** 1927
- **System Administration and Monitoring Moving Objects Using Mobile Devices** 1934
Casual gaming to encourage active ageing

Raymundo Cornejo, Daniel Hernández, Mónica Tentori, Jesús Favela ..............................................................1940

Content related to Computing Security on Computer Engineering Degree according to International Professional Certificates

David García Rosado, Luis Enrique Sánchez, Daniel Mellado, Eduardo Fernández Medina .....................................1951

Copper Metal Price Using Chaotic Time Series Forecasting

Raúl Carrasco, Manuel Vargas, Ismael Soto, Guillermo Fuertes, Miguel Alfaro ......................................................1961

Design of a Set of Software Tools for Side-Channel Attacks

Alberto Fuentes, Luis Hernández, Agustín Martín, Bernardo Alarcos .................................................................1966

Do historical metrics and developers communication aid to predict change couplings?

Igor Scaliante Wiese, Rodrigo Takashi Kuroda, Gustavo Ansaldi Oliva .................................................................1979

Identifying Requirements for Implementing ad-hoc Geo-references BPM

Gustavo Zurita, Nelson Baloian ..........................................................1989

Personalization of Gamification in Collaborative Learning Contexts using Ontologies

Geiser C. Challco, Dilvan A. Moreira, Ig I. Bittencourt, Riichiro Mizoguchi, Seiji Isotani ........................................1995

QC-MDPC McEliece: an Optimized Implementation of a New McEliece Variant

Homero Oliveira Martins, Anderson Clayton Alves Nascimento .................................................................2003

Rogers’ Isomorphism Theorem and Cryptology Applications

Flávio Luis de Mello, Roberto Lins de Carvalho ........................................................................................................2009

Unconditionally Secure Quantum Communications via Decoherence-Free Subspaces

Elloá B. Guedes, Francisco Marcos Assis ..............................................................................................................2017
