Significant Accomplishments during the year (Please explain why these are significant and include details and examples):

The Chapter organized in Athens a number of lectures in Athens, including a daily workshop on the new structure of the Greek Electric Power System. Volunteer participants gained experience and promoted new national and international relations and ties.

Benefits to Industry and PES Members from the 2005 Work (provide specific examples and explain what the benefits are):

The lectures organized helped the exchange of ideas and promoted national and international cooperation. In particular, the members benefited from the latest advancements in the field of power engineering.

Benefits to Volunteer Participants from the 2005 Work (provide specific examples and explain what the benefits are):

Volunteer participants gained experience and promoted new national and international relations and ties.

Recognition of Outstanding Performance (include all award winners and their affiliations for which your area is responsible):

Ms. Manial Pavella, Prof. Emeritus of the University of Liege, was nominated for the 2005 Chapter Outstanding Engineer Award for her contribution to the transient stability assessment of the Hellenic Power System.

Significant Plans for next year:

The Chapter will continue to organize lectures and workshops, trying to make use of the DLP program. The POWERED 2006 competition will also be organized. The Chapter is actively participating with two members in the Permanent Steering Committee of the IEEE Power Tech Conference Series.

Problems and Concerns:

Submitted by: Costas Vournas
Date: December 27, 2005

Note: To be submitted no later than December 31, to the Chapter Representative
