

IEEE Product Safety Engineering Society

IEEE PSES Field of Interest Statement

The field of interest of the Society shall be the theory, design, development, and implementation of product safety engineering within scientific, engineering, industrial, commercial and residential arenas. The Society will provide a focus for cooperative activities, both internal and external to IEEE, including the promotion, and coordination of product safety activities among IEEE entities.

In addition, the Society will provide a forum for product safety professionals and design engineers to discuss and disseminate technical information, to enhance personal product safety skills, and to provide product safety outreach to engineers, students and others with an interest in the field.

Advantages of Membership

Makes you part of a community where you will:

- Network with technical experts at local events and industry conferences.
- Receive discounts on Society conferences and symposiums registration fees.
- Participate in education and career development.
- Address product safety engineering as an applied science.
- Have access to a virtual community forum for safety engineers and technical professionals.
- Cooperative promotion and coordination of Product Safety Engineering activities with multiple IEEE Societies.
- Provide outreach to interested engineers, students and professionals.

Special Message:

2006 IEEE Product Safety Engineering Symposium:

<http://www.ieee-pses.org/symposium/>

Society Website: <http://www.ieee-pses.org/>

E-Mail List: <http://www.ieee-pses.org/emc-pstc.html>

Virtual Community: <http://www.ieee-communities.org/emc-pstc>

Membership: The society ID for renewal or application is "043-0431" Yearly society fee is US \$35.
