9th

European Conference on Applied Superconductivity

September 13 - 17, 2009

Dresden, Germany

Scope of the Conference

The 9th European Conference on Applied Superconductivity, EUCAS 2009, will be held in Dresden, Germany, September 13-17, 2009.

Since 1993, EUCAS is one of the leading international conferences dedicated to new developments in superconductivity, superconductors and their applications. Every two years the scientific community in this field meets in Europe to present and discuss new ideas and developments. It brings together scientists from universities and research centres with industry to share recent achievements and innovations in the field of applied superconductivity. The conference will cover continuing improvements in low T_C materials and applications with the emerging applications of High Temperature Superconductors and exciting developments of new superconducting materials. The conference topics will cover materials and basic properties, wires and tapes, superconducting electronics as well as large scale applications.

Besides science, fall in Dresden gives you also a perfect opportunity to explore the rich culture and the beauty of the city as well as the landscape nearby.

We are looking forward to meet you in Dresden for EUCAS 2009.

Conference topics

Materials & Basic Properties

Bulk Materials & Single Crystals
MgB₂
Oxypnictides
Thin Films
Multilayers & Low Dimensional Structures
Theoretical Aspects & Simulation
Flux pinning

Wires & Tapes

Coated Conductors
Bi-2212 & Bi-2223
MgB₂
Upscaling
AC Losses & Stability
Low T_C Conductors

Large Scale Application

Magnets & Magnet Technology
Power Cables
Motors & Generators
Levitation, Transportation
Fault Current Limiters & Transformers
Cryogenics
Flywheels

Electronics

Junctions & SQUIDS
Digital Electronics
Detectors & Mixers
Novel Devices & Applications
Bio Applications
Microwave Devices
