General Chair

Daniel J. Dailey
 University of Washington

dailey@its.washington.edu
 (206) 543-2496

Conference Topics

Travel and Traffic Management
 Public Transportation Management
 Commercial Vehicle Operations
 Advanced Vehicle Safety Systems
 Electronic Payment
 ITS Modeling and Analysis
 Emergency Management and Transportation Security
 Other Topics

The IEEE Intelligent Transportation Systems Society (ITSS) is sponsoring a conference on basic research and applications of leading advances in communications, computer, control, and electronics technologies related to Intelligent Transportation Systems.

Proposals for Special Sessions are invited to provide focused presentations on themes of interest. A special session must consist of four or five papers that are closely related or that show a comprehensive coverage of the special topic. Innovative approaches to ITSS topics or new areas within the scope of ITSS are encouraged.

Proposal Details

Proposal Requirements:

- **Session Title**
- **Statement of Innovation or Novelty**
- **Name and Contact Information for Organizer(s)**
- **Biography of Organizer(s)**
- **Prior Special Sessions by Organizer(s)**
- **List of Proposed Authors and their Contributions**

Special session papers will be reviewed similarly to regular papers and submission does not guarantee acceptance. If less than four papers submitted to the special session are accepted after the review process, the special session will be cancelled. The program chair and the special session committee reserve the right to merge the papers into the regular sessions.

Proposal in PDF form must be sent electronically to

Steve E. Watkins
 University of Missouri-Rolla
steve.e.watkins@ieee.org

Submission Deadline: March 15, 2007
