IEEE Conference Publication Form

The Conference Publication Program (CPP) assures wide distribution of conference proceedings by providing abstracting and indexing of all individual conference papers for inclusion in worldwide databases. The CPP makes every reasonable attempt to ensure that abstracts and index entries of content accepted into the program are included in databases provided by independent abstracting and indexing (A&I) services. Each A&I partner makes its own editorial decision on what content it will index. IEEE cannot guarantee entries are included in any particular database.
